PROFESSIONAL PROFILE

UX Designer and Researcher with a BA in Psychology and Sociology from the University of Botswana. My path to UX was not linear — it started with people, moved through code, and arrived at design. I sit at the intersection of psychology, sociology, and technology, creating experiences that are functional, accessible, and genuinely human. Holder of the Google UX Design Certificate (2026). Professionally experienced in client relations, account management, and multi-brand campaign coordination. Open to UX Research, UI Design, and Front-End Development roles. Available to relocate to South Africa immediately.

UX & DESIGN PORTFOLIO

Banking Without Borders — Mobile-First Bank Account Setup | *Google UX Design Certificate Project 2026*

- Designed a mobile-first onboarding experience for two underserved groups in South Africa — first-time account holders and foreign nationals — addressing both logistical and psychological barriers to account opening.
- Full end-to-end UX process: secondary research, competitive analysis, persona development, user flows, wireframing, design system creation, high-fidelity UI, and two rounds of usability testing.
- Usability testing confirmed the app compared favourably to established banking apps. Participant feedback: "Everything makes sense. Looks very easy to use. Better than ABSA dare I say."
- Responsive desktop website currently in development to extend the experience across platforms.
- Tools: Figma | Portfolio: lebogangmosimaneotsile.github.io

Kopangang — Digital Community App for Faith Groups | *Personal Project 2022–2025*

- Research-led app concept originating from a formal qualitative study on how COVID-19 disrupted religious community practices in Botswana — 72 participants, 6 faith groups, phenomenological research design.
- Full process: qualitative research, insight synthesis, persona development, information architecture, sitemap, user journey mapping, wireframing, and UI design across three core features: The Sanctuary, The Plaza, and The Village.
- Demonstrates ability to translate real academic research into a purposeful digital product concept.
- Tools: Figma | Portfolio: lebogangmosimaneotsile.github.io

Spotify Mobile App Redesign | *Self-Initiated Concept Project 2025*

- Self-initiated redesign identifying three core navigation failures in Spotify's mobile app, validated by 2.3 million users on social media who expressed the same frustrations.
- Focused on information architecture — default landing screen, library filter structure, and navigation bar hierarchy — rather than visual redesign.
- Tools: Figma | Portfolio: lebogangmosimaneotsile.github.io

Leave Optimiser | *Self-Initiated Product 2024*

- Designed and built a web app that maximises annual leave days by calculating optimal dates to take off around public holidays, covering Botswana and South Africa.
- Self-initiated from a real problem — born from observing how people struggle to strategically plan leave without a dedicated tool.
- Future plans include Google Calendar integration and push notifications for upcoming holiday windows.
- Tools: HTML, CSS, JavaScript | Live: leave-optimiser.vercel.app

PROFESSIONAL EXPERIENCE

Sales & Marketing Executive / Account & Social Media Manager | *weDrive · REMOO · Print Afrique · Retail Afrique · Bona Outdoor Advertising Nov 2024 – Nov 2025*

- Served as primary account liaison for five diverse brands, coordinating all campaign requirements, timelines, and deliverables from brief to execution.
- Collaborated with designers and developers on website content and layout to optimise user clarity and support specific campaign goals.
- Developed and enforced brand guidelines to ensure consistent brand voice and experience across digital and print channels.
- Translated complex client briefs into actionable outputs for internal creative and production teams.

Independent Content Creator & Social Media Manager | *Self-Employed 2020 – Present*

- Built a personal brand across TikTok and Instagram through consistent storytelling — developing a distinct voice and growing an engaged community.
- Secured an unsolicited PR partnership with Vaseline after brand representatives identified alignment with their target audience.
- Additional brand collaborations: Selle Jewellery, Collections by BK Proctor.

Event Host & Emcee | *Collections by BK Proctor Fashion Gala Dec 2023*

- Selected as on-stage host for a live fashion show — demonstrated strong public speaking, stage presence, and brand representation under live conditions.

Event Logistics Assistant | *Twist n' Shake* Apr 2019 – May 2024

- Supported delivery of high-stakes events through direct guest and client interaction, demonstrating calm problem-solving under pressure.

Administrative Assistant (Receptionist) | *McBain-Kaang Attorneys* Jan – Apr 2017

- Managed a busy front desk — client reception, appointment coordination, and handling confidential documents with discretion.

EDUCATION

BA Psychology & Sociology | *University of Botswana* 2018 – 2023

- Double major. Research concentration in cyberpsychology, technology-mediated behaviour, human adaptation during crisis, and institutional behaviour change.
- Strong foundation in qualitative and quantitative research methodology, applied psychology, and industrial-organisational psychology.

CERTIFICATIONS

Google UX Design Certificate | *Coursera* 2026

- UX foundations, human-centred design, wireframing, prototyping, usability testing, accessibility, equity-focused design, and responsive design.
- Credential: credly.com/badges/1f1ebb6d-6787-40e0-91f5-f6eee27c3ba9

Front-End Web Development | *Udemy* 2024

- HTML, CSS, JavaScript fundamentals and responsive design.
